furkanberkant.github.io

Backend Software Engineer specializing in scalable distributed systems. Delivered caching, and query optimization. through asynchronous processing, strategic for
Developed real-time data processing services handling using Kafka, Cassandra, and PostgreSQL. Experienced in Java, Spring Boot, distributed systems, Kubernetes, and cloud-native technologies across IoT and data-intensive domains.

10/2023 – 02/2026

, Comodif

- Optimized critical API performance by (p95 latency) through asynchronous parallel data loading, caching strategies, and database query optimization
- Developed for real-time telemetry processing across , implemented data handlers and mappers, built services for storing and retrieving device data in
- Built customer support system integrating for real-time support requests from mobile applications, improving customer response time and enabling instant issue resolution
- Developed data services using for high-volume telemetry ingestion and for transactional operations, created migrations for schema management
- Deployed and managed microservices using and with charts, configured for GitOps-based deployments and contributed to CI/CD automation via
- Implemented observability infrastructure with and , created monitoring dashboards for platform health and performance metrics, built system for Kafka lag and service health issues across
- Collaborated in using Agile methodologies, participated in code reviews and pair programming sessions

01/2021 – 05/2021

, Otoparcasan

- Developed REST API integrations with major Turkish e-commerce marketplaces (Gittigidiyor, N11, Hepsiburada) for automated product and order synchronization

Java (Proficient), Spring Boot, Spring Cloud, Python
Apache Kafka, Protocol Buffers, gRPC, REST APIs
PostgreSQL, Apache Cassandra, Redis, Microsoft SQL Server
Asynchronous & Concurrent Programming, Caching (Redis, Caffeine), Query Optimization
Docker, Kubernetes, Helm, GitHub Actions, ArgoCD, CI/CD, GitOps
Prometheus, Grafana, Loki
Microservices Architecture, Event-Driven Design, Agile/Scrum

09/2019 – 07/2023

Trabzon, Turkey

Karadeniz Technical University

Focused on software development, statistics, and optimization.

- IBM Explore Emerging Tech
- IBM Introduction to DevOps
- IBM Introduction to Agile Development and Scrum
- IBM Getting Started with Git and GitHub
